## **C4 DISCOVERY**

## Survey with women regarding cervical cancer

## QUESTIONS TO ASK WOMEN IN YOUR FAMILY, NEIGHBORS

Each student should ask 4 women and take notes.

Did you know that Chambers County has the highest rate of cervical cancer in Alabama? We, the health science students at Lafayette and Valley High Schools, are working on a campaign to promote cervical cancer screening among women in our county. Can I ask you some questions?

What do you know about cervical cancer? Explain what you learned about cervical cancer. Make sure to include that it is caused by a virus (HPV) and that it can be prevented through

HPV vaccination and screening.
