

**WIPE
OUT**
VACCINATION IS KEY! WIPE OUT HPV!

Would two or three shots

be worth it for you to **protect yourself** from getting six types of cancer?

Unfortunately, most cancers cannot be prevented. **But some can...**

There are six **types of cancer** that are caused by a **virus called HPV** - cervical, vaginal and vulvar cancer among women, penile cancer among men, and mouth/throat and anal cancer among men and women.

The GOOD NEWS
*is there is a vaccine that will
protect us from those cancers...*

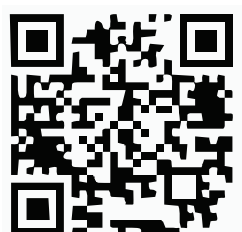

If you are between
9 and 14 years of age
you only need two shots

If you are **15 and older**
you will need three shots

Talk to your **parents** about it and
consider **getting VACCINATED!**

**WIPE
OUT**
VACCINATION IS KEY! WIPE OUT HPV!

*Did you know that there is a virus
that causes multiple types of **cancer**?*

Vaccinating ourselves
*is the **best defense** against a villain called **HPV***

Can we protect ourselves? **YES, WE CAN!**

*By getting a **cancer vaccine**
that protects us (men and women) from these cancers.
But it is best to build this wall before the virus reaches our bodies.
That is, **get vaccinated against HPV** before
it comes anywhere near us.*

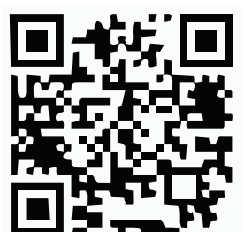

*Consider getting
the **HPV vaccine**
that will be offered
in our school in
the upcoming month.*

*For more information regarding the **HPV**
vaccination at the **Chambers County Schools**
contact the **school nurses***

**WIPE
OUT**
VACCINATION IS KEY! WIPE OUT HPV!

The **ACTION DAY** is approaching...

By now everyone at
Valley High School/LaFayette High School
knows how nasty the HPV virus is and
all the cancers it can cause.

The **HPV vaccine** will be offered
to us right here at school.
We do not even need to go
to the doctor to get it!

**MAY
8th**

Let's consider getting
the **HPV vaccine**.
Let's **talk** to our **parents**
about getting consent
to get vaccinated.

For more information regarding the **HPV
vaccination** at the **Chambers County Schools**
contact the **school nurses**
